

Aether Robotics

Autonomous warehouse picking robots

Problem

- Warehouse labor shortages
- Picking is 60% of fulfillment cost
- Existing automation is rigid and costly

Solution

- General-purpose picking robot arm
- Vision + grasp-planning software
- Deploys in days, not months

Product

- Robot hardware + control software
- Cloud fleet management
- Prototype v1 in lab testing

Market

- Warehouse automation market \$30B by 2030
- E-commerce growth as tailwind

Traction

- 1 LOI from a regional 3PL
- Prototype demonstrated in lab
- No revenue yet

Business model

- Robotics-as-a-Service (monthly per robot)
- Software attach fee

Competition

- Named: Symbotic, Berkshire Grey
- We claim faster deployment + lower cost

Team

- Sam Whitfield - CEO (ex-SaaS PM)
- Lena Park - CTO (computer vision PhD)
- Eng team is all-software; no hardware/mechanical lead

Ask

- Raising \$5M seed at \$25M post-money
- Build hardware team + first 10 units
