

CareLoop Health

AI triage assistant for primary-care clinics

Problem

- Clinics overwhelmed by patient intake
- Nurses spend hours on phone triage
- Patients wait days for guidance

Solution

- AI triage chat + clinician dashboard
- Routes patients to the right care level
- Cuts intake workload by 40%

Product

- Patient-facing symptom intake
- Clinician review + override workflow
- EHR integration (pilot with one EHR)

Market

- US primary care software market \$12B
- 20k independent clinics as initial segment

Traction

- 3 paid clinic pilots
- \$180K ARR
- 92% triage agreement vs. nurse baseline (internal)

Regulatory

- Positioned as clinical decision support
- FDA pathway 'under review' (no submission yet)
- No HIPAA security audit completed yet

Competition

- Named: Zocdoc, Ada Health
- We claim deeper EHR integration

Team

- Priya Nair - CEO (ex-consultant, first-time founder)
- Tomas Reyes - CTO (ex-fintech eng lead)
- No clinical/regulatory co-founder or advisor listed

Ask

- Raising \$3.5M seed at \$18M post-money
- Build regulatory + clinical team
